Notice to Fish Harvesters

**2021-2022 GULF NOVA SCOTIA – ATLANTIC HALIBUT (4T)
FIXED GEAR FLEET, VESSEL CLASS A146
SUMMER FISHERY OPENING DATE**

Antigonish, (NS) – March 3, 2022

Fisheries and Oceans Canada (DFO) announces that the Atlantic halibut fishery will open for Gulf Nova Scotia fixed-gear licence holders, using vessel class A146, in the portions of NAFO Division 4T known as 4T1, 4T8, 4T2a and 4T2b.

As per consultations with industry, this fishery will take place from 06:00 hrs Tuesday, March 22, 2022 to 18:00 hrs Friday, March 25, 2022. There will be consideration of delaying the fishery due to ice conditions or inclement weather.

There is approximately 17.9 t of quota remaining for the 2021-2022 GNS Atlantic halibut summer fishery.

Only those harvesters who did not already participate in the 2021-2022 GNS Spring halibut fishery are eligible to participate in the Summer halibut fishery.

Replacement vessels or vessel transfers will only be authorized from another fisher whose homeport is in the Gulf Nova Scotia administrative area.

Should portions or all of 4T1, 4T8, 4T2a and 4T2b close due to the North Atlantic right whales dynamic closure protocol, Atlantic halibut fishing for the vessel class A146 will be permitted but it will be mandatory to closely attend fishing gear as identified in the conditions of licence.

Fishers are reminded that during the period where fishing is authorized, it is the responsibility of the licence holder to take into account the marine safety notices issued, among others, by Environment and Climate Change Canada and Transport Canada, as well as the standards and best practices in marine safety, and to take all measures to ensure a safe fishery.

Management measures to minimize interactions with North Atlantic right whales:

The management measures to protect the right whales are available at the following Internet address: <http://dfo-mpo.gc.ca/fisheries-peches/commercial-commerciale/atl-arc/narw-bnan/management-gestion-eng.html>
